

How to Install OSSPhone Plugin for Spark (Mac)

1.) Unzip/Extract the file.

2.) Double-click OSSPhone_plugin_installer.pkg

*This should automatically install the necessary components for the plugin

3.) Start Spark.

4.) OSSPhone will display a notification that the plugin has successfully initialized.

5.) You may now use the plugin to make your calls.

*Remember to set the Softphone Configuration.

**Tested on Mac OS X 10.4.11; Spark 2.5.8
